

Instructional Framework In Number

Number Words and Numerals	Addition and Subtraction to 20		Addition and Subtraction to 100		Multiplication and Division
	Early Arithmetical Learning	Structuring Numbers to 20	Conceptual Place Value	Addition and Subtraction	
FNWS 1 to 20 BNWS 1 to 10 Numerals 1 to 10	Counting involving visible items	Early Structuring (finger patterns, spatial patterns & temporal patterns)			
FNWS & BNWS 1 to 30 Numerals 1 to 20	Counting involving screened items	Partitions of 5			
FNWS & BNWS 1 to 100 NWS by 10s on the decuple Numerals 1 to 100	Count-up-from & count-down-from strategies	Small Doubles & 5-plus Partitions of 10	Grouping and counting in 10s		Building and describing equal groups and equal shares
FNWS & BNWS beyond 100 NWS by 10s on and off the decuple NWS by 2s, 5s, 3s & 4s Numerals to 1000	Advanced count-by-ones strategies	Structuring numbers 1 to 10 Large doubles & 10-plus Partitions of 20	Incrementing and decrementing by 10s (on and off the decuple)		Counting-based strategies – items and groups visible
	Non-count-by-ones strategies	Structuring numbers 1 to 20	Incrementing and decrementing flexibly by 10s & 1s	Add and subtract to and from a decuple Higher decade addition and subtraction (2 digit +/- 1-digit)	Counting-based strategies – items screened, groups visible
NWS involving 10s and 100s to 1000 and beyond Numerals beyond 1000				Basic jump or split strategies for 2-digit +/- 2-digit Flexible strategies for 2-digit +/- 2-digit 3-digit addition and subtraction (simple cases)	Counting-based strategies – items and groups screened Structuring numbers multiplicatively (multiple levels of units) Flexible multiplicative strategies (x/+ to 10 by 10) Grounded habituation (x/+ to 10 by 10) Extended multiplication and division
